# General Information

## Agency Approvals:

The majority of products manufactured by Marathon Special Products are Underwriters Laboratories and Canadian Standards Association approved.

The approval status of products can be found throughout the catalog. Below are the different approval forms and brief descriptions.

Listed products by Underwriters Laboratories have been evaluated to U.S. safety requirements. These products are qualified for use in equipment without end-use agency approval when applied within the product's rated performance.

Listed products by Underwriters Laboratories have been evaluated to both U.S. and Canadian safety requirements. These products are qualified for use in equipment without end-use agency approval when applied within the product's rated performance.

Recognized products by Underwriters Laboratories have been evaluated to U.S. safety requirements. These products are components of a larger product or system and have guidelines addressing the suitability when used in an end product.

Recognized products by Underwriters Laboratories have been evaluated to U.S. and Canadian safety requirements. These products are components of a larger product or system and have guidelines addressing the suitability when used in an end product.

Certified by Canadian Standards Association, suitable for use in other equipment where Canadian Standards Association determines the suitability of the combination.

Compliance with European Union Low Voltage Directive.

## Tightening Torque:

Specified tightening torque is listed for all products, either on the carton label or the product label. All torque specifications are based on UL 486. In some cases, because of various connector designs, our specified torque is different from the torque tables shown in UL 486.

## Wire Ampacity:

The ampacity of a wire is its current carrying capacity with reference to the cross sectional area of the conductor(s), the temperature rating of the insulation and ambient temperature.

Marathon specified wire ranges are based on UL approved tests using 75°C wire. Wires with temperature ratings other than 75°C are approved while observing NEC Article 310 wire tables for allowable ampacities of insulated conductors. Marathon voltage and amperage ratings remain constant and are independent of the temperature rating of the wire used in application. Wire gauges and type must remain within the Marathon specified ranges to be UL approved. However, UL approval for higher currents may be obtained in some end-use applications.

# General Information

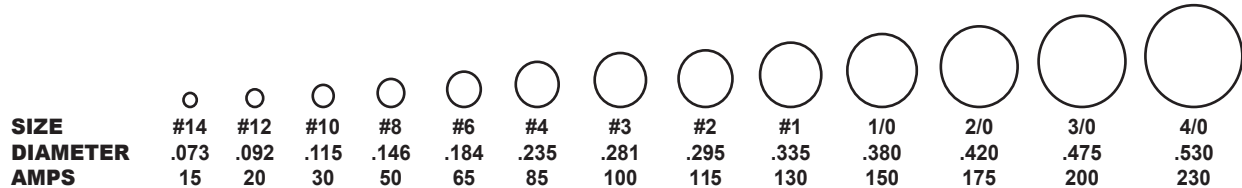

## Tolerances for Catalog Dimensions:

Length Dimensions	Tolerance	All Other Dimensions	Tolerance
1.0" - 5.0"	± .030	X.X"	± .030
5.1" - 10.0"	± .050	X.XX"	± .020
10.1" - 15.0"	± .060	X.XXX"	± .010

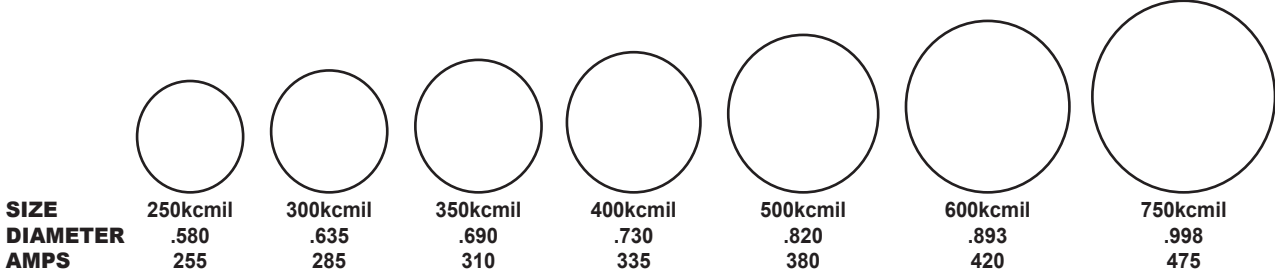

Note: Catalog Dimensions are for guidance only and are not to be construed as inspection standards.

This catalog is intended to present product data that will help the end user with design application. Marathon Special Products reserves the right to change or update without notice. Please visit [www.marathonsp.com](http://www.marathonsp.com) for the most up-to-date product information.

Wire Chart - based on UL Class B/C stranded wire (also known as code wire or rigid stranded wire).

## SCCR Information:

The requirements of the National Electric Code (NEC) and UL508A now require many electrical panels to carry a Short Circuit Current Rating (SCCR). Analyzing the SCCR of individual components and overcurrent protection devices is a method of determining the SCCR of an electrical assembly.

Many of Marathon's recognized and listed power blocks have now been tested and approved for higher SCCR. The higher ratings are based on proper wire sizes and the appropriate circuit protection device (fuses or circuit breakers). UL508A does allow default SCCR for power distribution blocks of 10,000A with no additional testing.

For detailed SCCR product information, please see the individual product data sheets available at: [www.marathonsp.com](http://www.marathonsp.com)

# General Information

## Flexible Stranded Wire Information:

Traditionally bare wire terminals used on Power Blocks and Fuse Holders have only been evaluated for use with rigid (Class B & C) wire. The majority of MSP's terminals have been evaluated for use with flexible stranded wire classes such as Class G, H, I (DLO) and K per UL 486A-B. This enables customers to be UL and NEC compliant while using flexible classes of wire without the use of crimp type terminals. We also supply a range of studded products to allow for the use of crimp terminals, which are recommended for larger wire sizes (greater than #1 AWG).

Flexible stranded wire classes also bring additional considerations to address such as an increase in wire diameter and the number of strands per a given wire size. The photo to the right shows two 250 kcmil wires of different classes. The one on the left is the traditional Class B with 37 strands. The one on the right is a finely stranded Class K. Although they are the same wire classification of 250, you can see the Class K is larger in diameter. This illustrates the need to specify a terminal to accept a larger standard wire size. The table below shows the increase in strand count per each wire size.

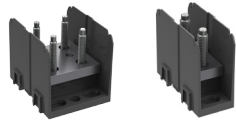

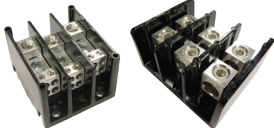

Wire Gauge	AWG/kcmil							Wire Gauge
	Rigid Stranded			Flexible Stranded				
	CSA Compact	Class B	Class C	Class G	Class H	Class I (DLO)	Class K	
	Number of Strands*							
#20 AWG							10	#20 AWG
#18							16	#18
#16							26	#16
#14							41	#14
#12							65	#12
#10		7	19				104	#10
#8							168	#8
#6	7			49	133		266	#6
#4							420	#4
#2							665	#2
#1							836	#1
1/0							1064	1/0
2/0	19	19	37	133	259		1323	2/0
3/0							1666	3/0
4/0							2107	4/0
250 kcmil							2499	250 kcmil

750 kcmil							7581	750 kcmil
1,000 kcmil		61		427			10101	1,000 kcmil

\*Specific quantity of strands for Classes G, H, I (DLO) & K may vary by manufacturer

# Power Blocks

Marathon Special Products has been an industry leader for supplying power blocks in North America since 1955. We've achieved this by providing one of the broadest line offerings with various sizes, terminal styles, electrical ratings and features. Our power block offerings listed below are sure to meet your needs.

Power Block Type	Page #	Description	
Bulk Fastening (BFPB)	5	The BFPB Series is a single pole design that consists of a series of stud fasteners to allow you to terminate various combinations of crimp lugs or flexible bus bar with one configuration. The series is ideal for use with flexible stranded wire terminations or large and abnormal wiring combinations.	
Mini Bulk Fastening	6	The Mini Bulk Fastening power block is available in many configurations to suit individual requirements. This product is ideal for power distribution options when terminating flexible stranded wire with crimp lugs for flexible bus bar.	
Enclosed (EPB)	7	The EPB Series are enclosed versions of our traditional power block configurations. This series consists of a modular single pole design that provides touch proof protection for splicer and distribution connector styles.	
High Voltage (HVPB)	9	The HVPB Series are High Voltage (1500 AC/DC) versions of our traditional power block configurations. This series consists of a modular single pole design for splicer, distribution and studded connector styles.	
Splicer & Distribution	11	Splicer and distribution power blocks are our traditional NEMA style offering. Splicer power blocks provide the same number of wire inputs as outputs, and distribution power blocks provide multiple load outputs per each incoming wire(s).	
Stud Configurations	17	Studded power blocks are part of our traditional NEMA style offering. These power blocks provide studs, or a combination of bare wire terminals with the stud, to terminate crimp lugs or bus bar to our power blocks to splice or distribute power.	
Miscellaneous Configurations	20	Miscellaneous power blocks are part of our traditional NEMA style offering. These power blocks provide tapped holes or quick-connects in addition to bare wire terminals to splice or distribute power.	

## Standards:

MSP's power blocks are either UL recognized or listed. Most have either CSA certification or cUR recognition for Canadian customers, as well as compliance to CE (Component IEC 60947-7-1).

Recognized power blocks comply to UL 1059 and CSA C22.2 No. 158. All of our power blocks meet the 600V spacing requirements for application classes B & C and some Class A (135s):

- Class A - Service; including dead front switchboards, panel boards and service equipment
- Class B - Commercial appliances; including business equipment and electronic data processing equipment
- Class C - Industrial, general

Listed power blocks comply to UL 1953. These are all rated 600V and are intended to be used on the load side of service equipment in accordance with the National Electrical Code, NFPA 70. These blocks are used for splicing conductors in metallic wireways, auxiliary gutters, junction boxes, termination boxes and control panels in order to distribute power to separate loads. Listed power blocks additionally provide feeder circuit terminal spacing requirements of UL508A.

# Bulk Fastening Power Block

## Electrical

- 1605 amps
- 1000 volts AC/DC (cULus)
- Multiple wire rating - refer to data sheets for details
- Provides feeder circuit terminal spacing

## Mechanical

- Insulator - thermoplastic: 125°C (257°F) - UL RTI
- Flammability, UL 94 V-0
- Mounting: panel mountable

## Features/Benefits

- Modular construction to accommodate numerous terminal options
- Available for 2 to 6 stud terminal positions
- Accommodates power distribution options for listed lugs sized up to 1000kcmil

## Features/Benefits - cont'd

- First power terminal block to have a high SCCR rating (35k) with no over current protection device
- Reliably terminates flexible stranded classes of wire with crimp lugs
- Suitable to terminate and distribute power with flexible bus bar

## Standards

- UL recognized file no. XCFR2.E62806 (UL 1059)
- cUR recognized file no. XCFR8.E62806 (UL 1059)
- RoHS compliant (all)

## Accessories (consult customer service)

- Covers - Flat screw-on - see chart for catalog numbers
- Hardware - included with the block as shown

# Mini Bulk Fastening Power Block

## Electrical

- 750 - 1500 amps
- 1500 volts

## Standards

- UL recognized file no. XCFR2.E62806 (UL 1059)
- cUL recognized

## Mechanical

- Can be panel mounted over din rail

## Accessories (consult customer service)

- Hinged covers available

## Features/Benefits

- Unique material allows 1500V UL rating
- SCCR 25ka rating with no over current protection device
- Accommodates various power distribution options with listed lugs
- Eliminates the need for self fabricated junction blocks in unique applications with large or unusual wiring combinations
- Improved reliability for flexible stranded wire termination with listed lugs
- Suitable to terminate and distribute power with flexible bus bar

# Power Blocks - Stud Configurations

## Electrical

- 115 - 1680 amps
- 600 volts AC/DC (UL)
- Flexible stranded wire compliant
- Multiple wire rating - refer to data sheets for details

## Mechanical

- Base, black thermoplastic or phenolic (see chart)
- Insulator temp-ratings
  - Thermoplastic: 125°C (257°F) - UL RTI
  - Phenolic: 150°C (302°F) - UL RTI
- Flammability, UL 94 V-0
- Mounting: panel mountable, 132 series is also DIN mountable

## Standards

- See chart for product specific approvals listed
- UL recognized file no. XCFR2.E62806 (UL 1059)
- CSA certified file no. LR19766 (CSA C22-2 No. 158)
- CE (Component IEC 60947-7-1)
- RoHS compliant (all)

## Accessories (consult customer service)

- Covers - see page 24 for series cover specifications
- Marking strips - available with custom printing
- Printing - consult factory for custom requests

## See on-line data sheets for:

- Dimensional drawings
- Detailed SCCR information
- Termination and mounting specifications

# Studded Power Feed Thru Terminal Blocks

## ST722 Series

### Electrical

- 300 volts AC/DC (UL)
- 115 - 175 amps (see chart)
- Wire range is determined by the compression lugs used. Typically accepts 2/0 - #8 AWG lug sizes.
- Short circuit current rating (SCCR) of 10K
- Factory and field wiring

### General Specifications

- Base, black thermoplastic
- Studs, brass, nickel plated
- Insulator temp-rating: 125°C (257°F) - UL RTI
- Flammability, UL 94 V-0
- Mounting: panel mountable (back or end)
- .73" centers (pole-to-pole)
- Accommodates two hole compression lugs with .625" centers and a max width of .64"
- Application torque: 35 lbf-in for #10 - 32 and M5, 50 lbf-in for 1/4" - 20 and M6

### Standards

- See chart for product specific approvals listed
- UL recognized file no. XCFR2.E62806 (UL 1059)
- CSA certified file no. LR19766 (CSA C22-2 No. 158)
- CE (component IEC 60947-7-1)
- RoHS compliant (all)

### Accessories

- Hardware - see table below for specifications
- Covers - see page 27 for series cover specifications
- Printing - consult factory for custom requests

### See On-line Data Sheet for:

- Panel cut-out specifications
- Detailed product specific information
- Termination & mounting specifications

## ST715 Series

### Electrical

- 300 volts AC/DC (UL 1059 Class B and C)
- 80 amps
- Wire range is determined by the compression lugs used. Typically accepts #6 - #14 lug sizes.

### General Specifications

- Base, black thermoplastic
- #10-32 studs, brass, nickel plated
- Insulator temp-rating: 125°C (257°F) - UL RTI
- Flammability, UL 94 V-0
- Mounting: panel (back or slide options)
- 2 pole at .56" center (pole-to-pole)
- Application torque: 35 lbf-in
- Accommodates two hole compression lugs on .625" centers and a max width of .50"

### Standards

- UL recognized file no. XCFR2.E62806
- cURus recognized file no. XCFR8.E62806
- CE (component IEC 60947-7-1)
- RoHS compliant (all)

## ST723 Series

### Electrical

- 600 volts AC/DC
- 380 amps
- Short circuit current rating (SCCR) of 10K
- Wire range is determined by the compression lugs used. Typically accepts 500 kcmil - 2/0 AWG lug sizes.

### General Specifications

- Base, black thermoplastic
- Studs, brass, nickel plated
- Insulator temp-rating: 125°C (257°F) - UL RTI
- Flammability, UL 94 V-0
- Mounting: panel (back mount only)
- 1.56" centers (pole-to-pole)
- Accommodates two hole compression lugs with 1.00" centers and a max width of 1.40"
- Application torque: 192 lbf-in

### Standards

- UL recognized file no. XCFR2.E62806
- cURus recognized file no. XCFR8.E62806
- RoHS compliant

### Accessories

- Hardware - see table below for specifications
- Mounting hardware included (4) #10 screws
- Covers - flat covers available (consult customer service)
- Printing - consult factory for custom requests

### ST723B38xx - General Dimensions

# Single Stud Connection Block

## ST710 Series

**General Specifications**

- Base, thermoplastic (available in red or black)
- Temperature rating of 125°C (UL RTI)
- Hardware, stainless steel
- 300 volt AC/DC
- Recommended mounting screw 1/4"
- Available with two stud sizes: 5/16" or 3/8"
- Designed for two or more wire lugs
- RoHS compliant

## ST750 and ST755 Series

### Electrical

- Designed for delta and wye wiring configurations
- 35 to 560 amps
- 250 - 1100 volts
- For use with listed crimp lugs

### General Specifications

- Base, thermoset polyester, 130°C (UL RTI)
- Studs and hardware, steel, plated
- Link, copper, nickel plated
- All blocks include links and hardware assembled
- Insulator temp-rating: 130°C (266°F) - UL RTI
- Flammability, UL 94 V-0

### Standards

- UR recognized file no. XCFR2.E62806
- cUR recognized file no. XCFR8.E62806 (investigated to CSA 22.2 No. 158)
- CE compliant - UL investigated to IEC 60947-7-1, file no. XCHG2.E243117, IEC 60947-7-1
- UL investigated to SANS 1804-2
- RoHS compliant

1700 series optional  
clear cover

STD = Standard Terminal - Connector Plate, 2 Phil-Slot Screws, Center M/S

SC = Short Circuit Terminal (Pin to be torqued to 5 in-lbs)

CC = Clear PVC snap on cover, sized to fit and protect

# Double Row Terminal Blocks

## General Information:

Double Row Terminal Blocks are available in many line-to-line spacings. Open and closed back designs are available as shown in the table below. Insulator bases are available in both phenolic and thermoplastic material. Each series has many hardware and marking options available.

## Ratings and Standards:

The voltage ratings of terminal blocks are based upon the minimum spacing between electrically conductive parts line-to-line through air and over surface and line-to-ground through air and over surface.

### Class A:

Service, including deadfront switchboards, panel boards and service equipment.

### Class B:

Commercial appliances including business equipment and electronic data processing equipment.

### Class C:

Industrial, general

Spacing Requirements (in inches)			
	Voltage	Through Air	Over Surface
Class A	51-150	0.500	0.750
	151-300	0.750	1.250
	301-600	1.000	2.000
Class B	51-150	0.063	0.063
	151-300	0.094	0.094
	301-600	0.375	0.500
Class C	51-150	0.125	0.250
	151-300	0.250	0.375
	301-600	0.375	0.500

50	600	600	603	56	Phenolic	#10-16	10-32	.687	1-12	Open Back <sup>1</sup>

<sup>1</sup> Open back terminal blocks require an insulator strip to achieve voltage rating.

<sup>2</sup> Wire Range for Bare (unprepared) only. Prepared wire range (used with crimp type ring, fork or spade terminals) is dependent on the size of the crimp terminal applied and must not exceed the Amp rating specified.

# Double Row Terminal Blocks

## 621 RZ Series

### Specifications:

- 30 amps
- 600 volts Class B/C
- Base, thermoplastic, 125°C (UL RTI)
- Screws, steel, #6-32 phil-slot
- Terminals, plated brass
- Closed back
- 1-30 poles at 7/16" centers
- Accepts lugs w/max width of .33"
- Bare wire range #14-#22 AWG

### Standards:

- UL recognized file no. XCFR2.E62806
- CSA certified file no. LR19766
- CE compliant (IEC 60947-7-1)
- RoHS compliant

## 671 GP Series (200 Series)

### Specifications:

- A Kulka<sup>®</sup> Brand
- 30 amps
- 150 volts Class C, 300 volts Class B
- Base, phenolic, 150°C (UL RTI)
- Screws, steel, #6-32 phil-slot
- Terminals, plated brass
- Closed back
- 1-30 poles at 7/16" centers
- Accepts lugs w/max width of .34"
- Bare wire range #12-#22 AWG

### Standards:

- UL recognized file no. XCFR2.E62806
- CSA certified file no. LR19766
- CE compliant (IEC 60947-7-1)
- RoHS compliant

## 602 / 802 GP Series

### Specifications:

- A Kulka® Brand
- 30 amps
- 300 volts AC/DC, Class B/C
- 802 series (riveted construction), 150 volts AC/DC, Class-C
- Base, phenolic, 150°C (UL RTI)
- JJ (GDI-30F) material available
- Terminals, plated brass
- Screws, steel, #8-32 phil-slot
- Open back design (insulator strip required for voltage rating - see page 68)
- 1-26 poles at 9/16" centers
- Accepts lugs w/max width of .44"
- Bare wire range #10-#18 AWG

### Standards:

- UL recognized, file no. XCFR2.E47811
- CSA certified, file no. LR19766
- CE compliant (IEC 60947-7-1)
- RoHS compliant

# Single Row Terminal Blocks

## General Information:

Single Row Terminal Blocks are available in four basic line to line molding sizes. Some are available in either open or feed thru/printed circuit designs. The basic material is phenolic. Modifications are also provided on most terminal blocks, including marking strips.

## Ratings and Standards:

The voltage ratings of terminal blocks are based upon the minimum spacing between electrically conductive parts line to line through air and over surface and line to ground through air and over surface.

### Class A

Service equipment including deadfront switchboards, panel boards and service entrance devices.

### Class B

Commercial appliances including business equipment and electronic data processing equipment.

### Class C

Industrial, general

Spacing Requirements (inches)			
	Voltage	Thru Air	Over Surface
Class A	51-150	0.500	0.750
	151-300	0.750	1.250
	301-600	1.000	2.000
Class B	51-150	0.063	0.063
	151-300	0.094	0.094
	301-600	0.375	0.500
Class C	51-150	0.125	0.250
	151-300	0.250	0.375
	301-600	0.375	0.500

## Reference Chart:

15	300	150	2590	64	Phenolic	#16-22	6-32	.375	1-25	Printed Circuit
20	300	300	2690	65	Phenolic	#14-20	6-32/8-32	.437	1-25	Printed Circuit

<sup>1</sup> Open back terminal blocks require an insulator strip to achieve voltage rating.

<sup>2</sup> Wire Range for Bare (unprepared) only. Prepared wire range (used with crimp type ring, fork or spade terminals) is dependent on the size of the crimp terminal applied and must not exceed the Amp rating specified.

# Single Row Terminal Blocks

## 411 GP Series

### Specifications:

- A Kulka® Brand
- 5 amps
- 300 volts AC/DC, Class B
- Base, phenolic, 150°C (UL RTI)
- JJ (GDI-30F) material available
- Terminals, plated brass
- Screws, steel, #2-56 phil-slot
- Open back design (insulator strip required for voltage rating - see page 68)
- 1-23 poles at 1/4" centers
- Accepts lugs w/max width of .19"

## 2590 GP Series

### Specifications:

- A Kulka® Brand
- 15 amps
- 300 volts AC/DC, Class B
- 150 volts AC/DC, Class C
- Base, phenolic, 150°C (UL RTI)
- Terminals, plated brass
- Screws, brass, #6-32 slotted
- 1-25 poles at 3/8" centers
- Accepts lugs w/max width of .30"
- Bare wire range #16-22 AWG

### Standards:

- UL recognized, file no. XCFR2.E47811
- CSA certified, file no. LR19766
- CE compliant (IEC 60947-7-1)
- RoHS compliant

## Marking Strips and Covers; Top-Mounted - Double Row

### Specifications:

- White vinyl material, 0.03" thick
- Two nylon spring clips for mounting provided
- Marking strips: printed on center line with letters or numbers for circuit identification
- Covers: printed on top, bottom or center line with letters or numbers for circuit identification
- Printing character size is 1/8 inch
- Unless otherwise specified, the marking goes down the center of the cover for print styles 01A, 01B, 01C, 01D
- Marking goes down the 2 sides of the cover for print styles 07A, 07B, 07C, 07D

# Terminal Block Accessories

## Marking and Insulator Strips; Sub-Mounted - Single Row & Double Row

Marking strips serve as insulation between terminal blocks and chassis, as well as providing a marking surface for terminal identification. When specified, they can be printed to show terminal designations by numbers, letters, symbols or any combination thereof. Insulator strips offer the same properties, but do not provide space for terminal identification. Both marking and insulator strips can be supplied pre-mounted on the back of each block thereby simplifying assembly and inventory control.

**Order Information:**  
FEED-THRU STYLE: For feed-thru terminal blocks, see styles 2, 3, 5, 6, 8, & 9 on page 70. Insert applicable feed-thru style designation in ordering code, i.e. Y, YSY, XY, 1904, 1921, 2000, 2004, 2020, 2021, 2104, 2120, 3000.

**AVAILABILITY:** Marking and insulator strips are available to fit most Terminal Blocks. See SERIES reference numbers on page 69 for a complete listing. If not listed, consult Customer Service for availability. Designate appropriate prefix (MS for marking strips or IS for insulator strip) in front of the SERIES number when ordering. Available materials: XP (general purpose laminate), XXXPFR (flame retardant), GME (glass cloth melamine), GEE (glass cloth epoxy).

## Marking Strip Printing Styles - Double & Single Row

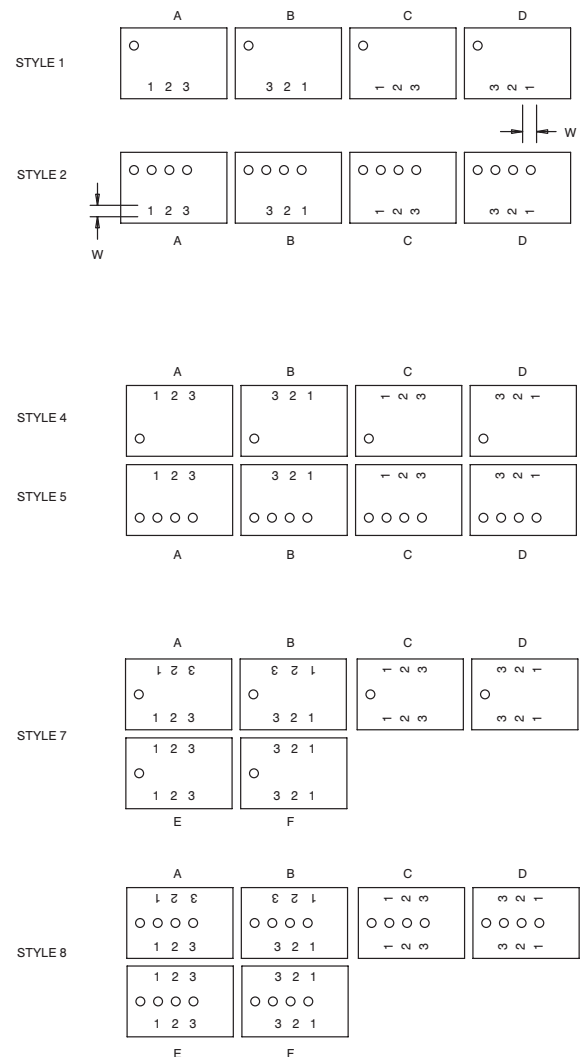

### Printing:

- Maximum number of characters is two.
- If unprinted marking strips are desired, insert the letter "X" in the print style order code.
- Printing color is black on white surfaces, and silver on black surfaces.
- Fungus proof coatings can be supplied per request per MIL-V-173A. State on order: "Coat after printing with MIL-V-173A varnish."

## Kliptite (Quick Connect) - Single Row

### Specifications:

Kliptite (Quick Connect) accept standard female wire terminals. These Kliptites are ideal for applications that require a positive, yet quick disconnect termination. Kliptites are assembled to the block with screws or, in some applications, riveted to the block.

Kliptites are available in 0°, 45° or 90° bends; one side or two side.

Material: Brass

Finish: Tin

Screw Construction	Rivet Construction	Tab Width	Tab Thickness	(2) 0° tabs	(2) 45° tabs	(2) 90° tabs	(1) 0° tab	(1) 45° tab	(1) 90° tab

J Type Jumper

Material: Brass  
Finish: Nickel Plate

JS Type Jumper  
(per 55164/28B)

mm = dim X 25.4

NOTE 1: These parts are not necessarily supplied flat. The functioning of the part, however, will not be interfered.

NOTE 2: All dimensions are applicable after the bus (jumper) is torqued down into the associate terminal board.

## RJ Type Jumpers

Material: Brass  
Finish: Nickel Plate

Max # of sections = 24

Note: 670A RZ, 599 Series, use 600 RJ

Max # of sections = 24

## RJS Type Jumpers

Material: Brass  
Finish: Nickel Plate

Max # of sections = 24

Note: 670A RZ, 599 Series, use 600 RJ

Max # of sections = 24

A-A-59125 superseded MIL-T-55164-C in 1997.

These terminal blocks are compliant to the A-A-59125 standard and are constructed to meet both standards.

# Military Class (A-A-59125)

## 37TB-B/40TB-B Series

**Specifications:**

- A Kulka® Brand
- 300 volts AC/DC
- Base, valox 420-SEO, grey color, 130°C
- Closed back design
- Screws, brass nickel plate, 6-32 binder head, slotted
- Terminals, brass nickel plate
- 3/8" centers
- Flammability rating 94 V-O
- Wire size #16
- 15 amps
- Parts are supplied with end plates
- RoHS compliant

# Military Class Marking Strips

## Marking Styles MSA, MSB, MSC

Top Surface of Marking Strip

Bottom Surface of Marking Strip

### Requirements:

- Type Mount: Bottom Only
- Dimensions: See Below
- Material: Type GME
- Marking: Marking Strips shall be Marked in Accordance with CID A-A-59125 (can be provided to MIL T55164)

A single letter shall be inserted in the above type designation to specify the marking style (A, B or C).

Both the front and the back of the marking strips shall be marked as indicated. The numbers shall be marked at a  $45 \pm 2^\circ$  angle with reference to the side of the marking strip, as indicated.

Type MSC37TB (blank single sided marking strip) shall have the same dimensions as type MSA.

Series	Style C	Dimensions							
		D	F	G	K	W	X	N*	
37TB	MSA, MSC MSB	0.31	1.19	0.28	0.60	0.14	0.13	0.16	0.88
40TB			1.50	0.59	--				
38TB		0.42	1.50	0.34	0.69	0.16	0.13	0.18	1.13
41TB			1.75	0.67	--				
39TB		0.50	1.63	0.41	0.75	0.20	0.13	0.21	1.31
42TB			2.00	0.69	--				

\*N dimension to replace D dimension for insulator strips  
\*\*Consult Customer Service on marking strips that are for terminal blocks with Z lugs.

For overall lengths, reference appropriate terminal block series A & B dimensions

Styles MSA & MSC:

Style MSB:

# Navy Class

## (A-A-59125) / (MIL-T-55164)

**Notes:**

Molded material is MAI-60 in accordance with MIL-M-14 (\*Molded material is GDI30F).

Nuts and connectors are provided when appropriate. They are unplated brass and shipped unassembled.

A-A-59125 superceeded MIL-T-55164-C in 1997.

These terminal blocks are compliant to the A-A-59125 standard and are constructed to meet both standards.

# Sectional Terminal Blocks

## General Information:

Sectionals are terminal blocks which are made up of individually molded units with electrically conductive members. Marathon offers barrier sectionals from 3/8" to 1/2" pitch, Euro style sectionals from 5mm to 12mm pitch with fusing, disconnection and grounding options. These sectionals will mount on either a standard 35mm DIN rail, channel rail, or panel (anchor directly).

## Ratings and Standards:

The voltage ratings of terminal blocks are based upon the minimum spacing between electrically conductive parts line-to-line through air and over surface and line-to-ground through air and over surface.

### Class A

Service equipment including deadfront switchboards, panel boards and service entrance devices.

### Class B

Commercial appliances including business equipment and electronic data processing equipment.

### Class C

General industrial and machine tool controls which can be further defined as equipment falling under UL 508.

## Spacing Requirements (in inches):

	Voltage	Thru Air	Over Surface
Class A	51-150	.500	.750
	151-300	.750	1.250
	301-600	1.000	2.000
Class B	51-150	.063	.063
	151-300	.094	.094
	301-600	.375	.500
Class C	51-150	.125	.250
	151-300	.250	.375
	301-600	.375	.500

## Applications:

Designed for electrical termination of wire where flexibility of circuit design is necessary. Accepts single or multiple wire sizes for tubular screw and tubular clamp styles.

# Sectional Terminal Blocks

## 3/8" Sectional Channel (C), Flat (F), & DIN Mount

**Specifications:**

- 600 volts AC/DC
- 32 circuits per foot
- Meets IP20 touchproof requirement
- UL recognized file no. XCFR2.E62806
- CSA certified file no. LR19766
- CE compliant
- RoHS compliant

6G38 TS KK F

### 6G38 TS - Tubular Screw Connector

**Materials:**

- Base - grey thermoplastic, 125°C (UL RTI)
- Tubular screw connector- copper, tin plated
- Screw - #10-32 steel, nickel plated
- Wire termination torque 16 in-lb

**Wire Ranges:**

- 50 amps (40 Amps CSA)
- Single and multiple wire combinations:

Stranded CU

- (1) #8 - #18 AWG
- (1-3) #12 AWG
- (1-4) #14 AWG

Solid CU

- (1) #10 - #16 AWG
- (1-3) #12 AWG
- (1-4) #14 or #16 AWG

**Ordering Code:**

6G38 TS F	Flat mount block	Std pk 100	See Figure 2 On Page 90
6G38 TS C	Channel mount block	Std pk 100	See Figure 1 On Page 90
6G38 TS DIN	DIN mount block	Std pk 25	See Figure 3 On Page 90

### 6G38 TSKK - TS with Wire Protector Connector

**Materials:**

- Base - grey thermoplastic, 125°C (UL RTI)
- Kant Kut connector- copper, tin plated
- Screw - #10-32, nickel plated, pad - steel
- Wire termination torque 16 in-lb

**Wire Ranges:**

- 40 Amps
- Single and multiple wire combinations:

Stranded CU

- (1) #10-#22 AWG
- (1-2) #12 AWG
- (1-3) #14 AWG
- (1-4) #16 AWG
- (1-5) #18 or #22 AWG

Solid CU

- (1) #10 - #14 AWG
- (1-2) #12 or #14 AWG

WIRE PROTECTOR

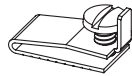

**Ordering Code:**

## 7/16" Sectional Terminal Block

**Specifications:**

- 600 volts AC/DC, 40 amp
- 65kA SCCR (see data sheet for details)
- 27 circuits per foot
- UL recognized file no. XCFR2.E62806, XCFR8.E62806
- CSA certified file no. LR19766
- CE compliant
- RoHS compliant

6G44 SP DIN

### 6G44 SP DIN - SEMS Pressure Connector, DIN Mounted

**Materials:**

- Base - grey thermoplastic, 125°C (UL RTI)
- Connector - brass, tin plated
- Screw - #6 with pad, steel, nickel plated

**Wire Ranges:**

- CU only, Str/Sol
- Base wire:  
(1) #12-#22 AWG  
(1-2) #22-12 AWG  
Classes B, C, G, H, I, K  
Wire termination torque 10 lb-in

Prepared wire (lug or spade):  
(1-2) #10-16 AWG

## DIN (Euro-Style) Sectionals

### Hardware:

- Insulating end sections - cover the last terminal of an assembly
- Insulating partitions - for visual and electrical separation of terminals grouped on DIN rail
- 2-position jumpers - connect two adjacent terminals (middle portion snaps off to assemble)
- 12-position jumpers - connects up to 12 adjacent terminals (middle portion snaps off to assemble)
- Jumper can be easily cut to length to connect smaller assemblies
- Connecting strap - for linking two adjacent 12-pole jumpers
- Safety cover - cover with warning label for line terminals which cannot be disconnected
- End brackets - anchors on both ends of terminal assemblies to hold the assembly in place
- DIN rail - standard 35 x 7.5 mm DIN rail, cut in 2 meter lengths with slots for mounting (steel, zinc plated)

## Universal Identification Labels Type MSH

### Specifications:

- Available plain, with numbers, letters or symbols
- Can be labeled vertically or horizontally
- Single label MSH 5 can be used for all sizes
- MSH5 & 6 are sold in ten strips of ten, MSH8 & 10 are sold in ten strips of five
- RoHS compliant

### Ordering Code:

# Fuse Holders

Marathon Special Products provides many NEMA/barrier style fuse holders with different terminal options for the majority of North American fuses and several enclosed (European/IEC) styles.

Class	Page #	Styles	Applications	Amp/ Volt Range	Withstand/ SCCR
Photovoltaic	97	Enclosed	Designed for bus bar termination. Uniquely designed with terminals to accept standard stock bus bar eliminating the need for custom fabricated bus bar.	Up to 30A 1000 V	30,000
Midget (10x38)	98 - 100	Barrier	Supplemental fuses similar to the size of a CC, used in more general applications where current limitation requirements are lower.	30-60 A 600 V	See Data sheets
		Sectional			
		Enclosed			
CC Class	101	Barrier	For branch and small motor protection where high current limitation is required.	30-60 A 600 V	200,000
	102	Enclosed			
J Class	103	Barrier, Open	For maximum protection of motors, controllers or panels.	30-600 A 250-600 V	200,000
	104	Enclosed			
R Class	105	Barrier	For higher levels of protection at the same size of the H Class, where higher levels of fault current potential exists.	30-600 A 250-600 V	200,000
H Class	106	Barrier	For protection where frequent outages are common and low levels of available fault current are available.	30-600 A 250-600 V	10,000
	107 - 108	Panel- Board			
T Class	109	Barrier, Open	For a high degree of protection and half to a third the size of R Class fuses.	30-600 A 300-600 V	200,000
G Class	110	Barrier, Open	For use in branch circuits where higher performance and lower power levels are needed.	15-30 A 480-600 V	100,000
General Purpose (Semi- Cond.)	111 - 114	Stud, Stud / Terminal	Recognized fuse holders for semi-conductor, L Class or others with variable geometry and include bolt down mounting profiles.	100-1200 A 1000 V	See Data sheets
Accessories	115 - 116	Covers, DIN-Rail Adapters	H, R, J, CC & M styles.	N/A	N/A

# Fuse Holders

## Wire Connector Styles

Hardware Options		Description	Illustration
S	Screw	Standard screw fastener primarily for ring/spade/fork terminals or small bare wire.	
SQ	Screw with Quick Connects	Screw terminal with additional 1/4" male quick-connect options.	
SP	SEMS Pressure Connector	Screw with a captive washer to provide more contact area for larger bare wire termination.	
SPQ	SEMS Pressure Connector w/ Quick Connects	SP option with additional 1/4" male quick-connect options.	
B	Box (or Compression) Terminals	Box connectors are ideal for large bare wire (up to 60A) termination.	

### CATALOG NUMBER NOMENCLATURE

-Excludes panel boards, enclosed and general purpose / recognized types.

# Enclosed PV10BW Fuse Holders

## Specifications:

- Up to 30 amps @ 1000 volts
- Evaluated for use with midjet 10x38mm fuses
- 30,000 amp SC withstand rating
- UL recognized UL4248-18
- CSA certified
- Bus bar terminal clamp (patent pending)
- Bare wire terminal for use with 90°C wire
- 94 V-2 flammability rating
- 130°C (266°F) UL RTI
- Gangable for multi-string configurations
- Has shown a 16% reduction in temperature over competitive models in high ambient testing

Catalog #	Description
PV10BW	Fuse Holder - midjet (10 x 38mm) PV fuses
PV10BWI	Fuse Holder with (red) blown fuse indicator - for PV fuse sized 10x38mm
MSH10	Marker Card - single white, snap-in labels 10mm wide for individual identification
EFH-MCCK C	Ganging Clips - used to group multiple fuse holders together as an assembly
MS 2	Front Cover - white 2' long strip to be cut to length and cover a set of holders
ECPVFH	End Cap - covers the end opening(s) of the bus bar terminal
MN35-2	Din Rail - 35 x 7.5 x 200mm long, slotted
MSK35	End Bracket - for anchoring in place on din rail

# Midget Barrier Fuse Holders

## Specifications:

- Available in 30 amp @ 600 volts
- Evaluated for use with midget 10x38mm fuses
- 100,000 amp SC withstand rating
- Copper box connectors available (add CU after catalog number)
- Clip, copper alloy, tin plated
- Quick connect standard with screw (S) or SEMS pressure (SP)
- UL recognized file no. IZLT2.E35113
- CSA certified file no. LR21455
- CE compliant
- RoHS compliant

# Midget Enclosed Fuse Holders

**Specifications:**

- 30 amps @ 600/1000 volts
- Evaluated for use with midget 10x38mm fuses
- 200,000 amp SC withstand rating
- DIN rail mount (35mm)
- Touchsafe design IEC type IP20
- Handle allows quick easy fuse change
- Blown fuse indication available
- Indication light AC and DC 65 VAC, 90 VDC volts minimum
- Base Materials: thermoplastic
- UL recognized for US and Canada, IZLT2.E35113, IZLT8.E35113

# Midget Sectional Fuse Holders

## Specifications:

- 30 amps @ 600 volts
- Evaluated for use with midget 10x38mm fuses
- 10,000 amp SC withstand rating
- Base, white nylon - type 6/6, 105°C
- Connector box type
- Accepts up to #10 AWG wire, either terminated or non-terminated
- Clip, copper alloy, tin plated
- UL recognized file no. IZLT2.E35113
- CSA certified file no. LR21455
- CE compliant
- RoHS compliant

6W30A1F with end piece (fuse not included)

## 600 Volts

Amps	Catalog # (replace "X" with # of poles)	Description	Standard Pack	Wire Range
30	6W30A1F	Flat Mount	10	#10-#14 AWG CU STRANDED
	6W30A1C	Channel Mount		
	6WEF	End Piece (Flat)		
	6WEC	End Piece (Channel)		
	MC	Mounting Clamp	25	
	MPC-6	6 Foot Channel	-	
	MPS-3	3 Foot Channel		
	GR-2	1/8" Diameter x 2' Long Nylon Rod		

### Flat Mount:

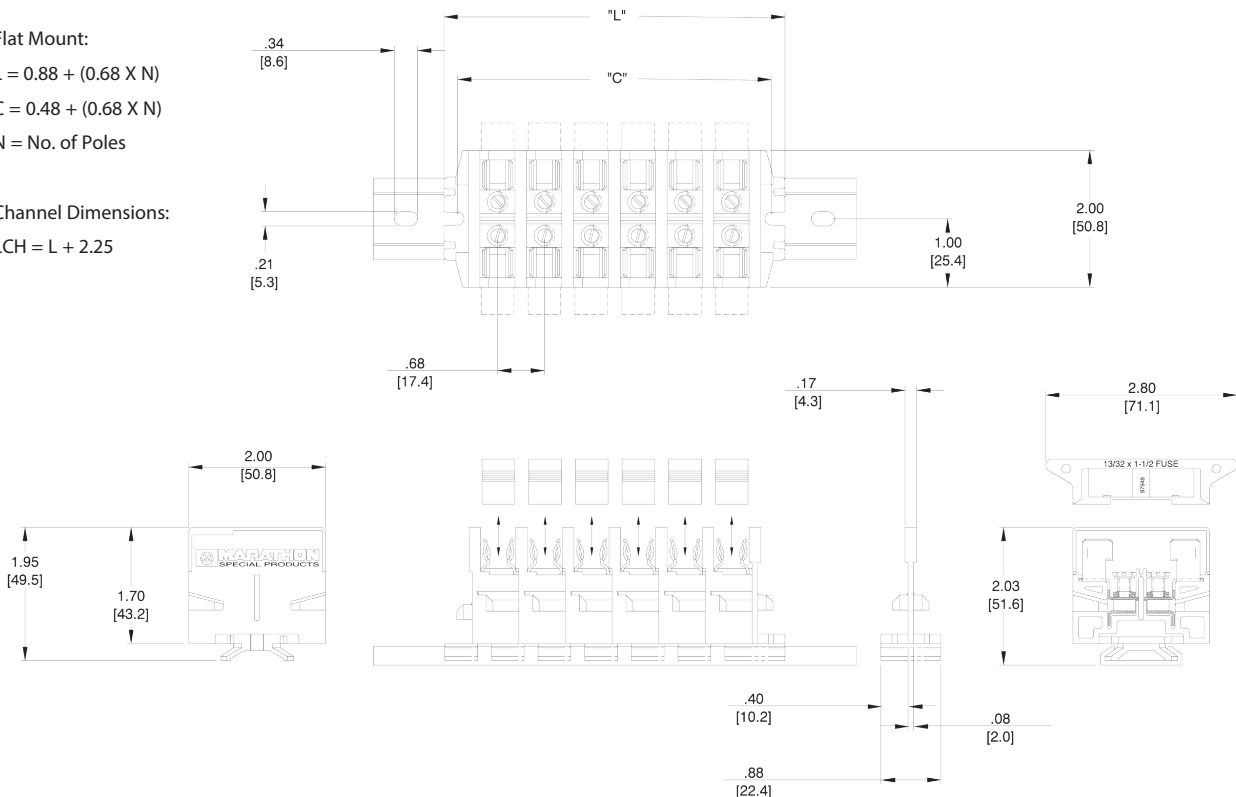

$$L = 0.88 + (0.68 \times N)$$

$$C = 0.48 + (0.68 \times N)$$

N = No. of Poles

### Channel Dimensions:

$$LCH = L + 2.25$$

# Class CC Fuse Holders

**Specifications:**

- Available in 30 and 60 amp @ 600 volts
- 200,000 amp SC withstand rating
- Copper box connectors available (add CU after catalog number)
- Clip, copper alloy, tin plated with patented reject member
- Expander block available
- Quick connect standard with screw (S) or SEMS pressure (SP)
- For box connectors, internal hex screw option is available
- 30 Amp - UL listed file no. IZLT.E35113
- 60 Amp - UL listed file no. IZLT.E35113, Class CD
- 30 Amp - CSA certified file no. LR21455
- 60 Amp - CSA certified file no. LR21455-91
- CE compliant
- RoHS compliant

# STSF Forklift/Semi Conductor Fuse Holder

## Stud Version - Specifications:

- Base, high strength thermoplastic
- Temperature rating of 170°C
- Studs, stainless steel (nuts and washers provided)
- 130 volt AC/DC, 1 to 400 Amps
- UL recognized file no. IZLT2.E35113
- RoHS compliant

## Applications:

This holder is used in direct current (DC) applications: forklifts, golf carts, electric vehicles, custom high-end car stereo systems, heavy equipment, marine aircraft, and similar applications.

ST SF

# Fuse Holder Covers

## Specifications:

- Material, thermoplastic
- Thermal rating, 125°C (RTI, per UL 746)
- Flammability, VO (per UL 94)
- UL listed accessories under file no. JDVS2.E181825
- In application, protection is consistent with IEC standard 529, designation IP20 (Finger Safe)\* - except CJ6100-1, CJ6100-2, and CJ6100-3
- Opening allows view of self-indicating fuses
- Holes for test probes and re-tightening of wire terminations
- Covers fit most fuse holder brands
- RoHS compliant

\*Applications involving fuse holders other than Marathon may not provide IP20 finger protection

\*\*Covers are recognized if used with recognized fuses

## Cover/Puller (Catalog # CVR-MCC)

Marathon's Cover/Puller was designed for use with the Class CC (30 Amp), Midget and Class G (15 & 20 Amp only) Fuse Holders. Once installed, the Cover/Puller provides an easy and safe way to remove fuses. In application, protection is consistent with IEC Standard 529, designation IP20 (finger safe).

# DIN Rail Adapters

Catalog #	Std Pack Qty
DIN R 1	10

## DIN R 1:

- Accessory to secure surface mount devices on DIN rail
- Made of acetal resin material
- High mechanical strength and rigidity
- Good resilience and resistance to creep
- Excellent dimensional stability
- Excellent low temperature toughness
- Wide end-use temperature range
- Will work with 2 and 3 pole Class H (250 volt, 30 amp) and Class R fuse holders (250 volt, 30 amp), and 985, 1100, 1200, 1500, and 1600 series heavy duty terminal blocks
- RoHS compliant

### Assembly Method:

- Press adapter onto rail, fasten component with #8 self tapping screw (screw not supplied)
- Assembly locks firmly unto DIN rail

Catalog #	Std Pack Qty
DIN R 2	10

## DIN R 2:

- For use with Class CC (30 amp), midget, and Class G fuse holders.
- RoHS compliant

### Assembly Method:

- DIN R 2 snaps securely to the Marathon fuse holders and to DIN rails without tools, which permits the fuse holders to be mounted directly to standard and low profile 35mm symmetrical and 32mm asymmetrical DIN rails.
- May be removed by lifting the disconnect tab

# Terms & Conditions

ALL QUOTATIONS ARE OFFERED AND ALL PURCHASE ORDERS ARE ACCEPTED BY SELLER SUBJECT ONLY TO THESE TERMS AND CONDITIONS.

## 1. DEFINITIONS:

"Buyer" means the entity to which Seller is selling Products or Services under a Contract.

"Contract" means the agreement between Buyer and Seller governing the sale of Products and/or Services by Seller to Buyer. These Terms and Conditions, the Quotation (if one is issued by Seller), any purchase order acknowledgement (if one is issued by Seller), and Buyer's purchase order (except to the extent that it conflicts with these Terms and Conditions, the Quotation, and/or the order acknowledgement) constitute the Contract.

"Products" means the equipment, parts, materials, supplies, and other goods that Seller has agreed to supply under the Contract. References in these Terms and Conditions to the purchase and sale of Products may mean, where applicable, the licensing of Software loaded on or provided with the Products.

"Quotation" means Seller's statement identifying the Products and Services, together with any quantity, price, delivery schedule, and/or other terms and conditions (in addition to or different from these Terms and Conditions), offered by Seller for sale to Buyer. A Quotation that incorporates these Terms and Conditions by reference shall be deemed to include these Terms and Conditions, whether or not Seller provides a complete copy of these Terms and Conditions to Buyer with the Quotation, with a purchase order acknowledgement, or with an invoice. Where there is a conflict between these Terms and Conditions and other provisions of the Quotation, the latter shall control.

"Services" means the services that Seller has agreed to provide under the Contract.

"Software" means software loaded on or provided with the Products.

"Seller" means the Regal entity – whether Regal Beloit Corporation ("RBC") or an RBC subsidiary – supplying Products and/or providing Services under the Contract.

"Terms and Conditions" means these "Terms and Conditions of Sale."

2. CONTRACT FORMATION: No agreement or understanding, oral or written, purporting to modify these Terms and Conditions shall be binding on Seller unless it is made in writing, specifically stating that it is a modification of these Terms and Conditions and it is signed by Seller's authorized representative. No course of dealing, usage of trade, or course of performance shall be relevant to explain or supplement any of these Terms and Conditions. If these Terms and Conditions are deemed an offer, Buyer's acceptance of Seller's offer is expressly limited to acceptance of these Terms and Conditions. Fulfillment of Buyer's order does not constitute acceptance of any of Buyer's terms and conditions and does not modify or amend these Terms and Conditions. Buyer's purchase order for the purchase of Products and/or for the performance of Services shall constitute Buyer's assent to these Terms and Conditions. Any terms and conditions contained in Buyer's purchase order or other form of communication from Buyer that are additional to or different from these Terms and Conditions, shall be deemed rejected by Seller, unless expressly accepted in writing by Seller's authorized representative. Alternatively, if these Terms and Conditions are deemed to be a response to, an acceptance of, or a written confirmation of, Buyer's offer, whether provided in the form of a purchase order or otherwise, Seller's acceptance is expressly conditioned upon Buyer's assent to these Terms and Conditions. Buyer's acceptance of Products tendered to Buyer by Seller shall constitute Buyer's express assent to all of the terms and conditions contained in these Terms and Conditions. All proposals, negotiations and representations, if any, made prior to or with reference hereto are hereby superseded by these Terms and Conditions. References in this Section to "these Terms and Conditions" shall be deemed to mean these Terms and Conditions and Seller's Quotation, if Seller has issued a Quotation.

3. ACCEPTANCE OF PURCHASE ORDERS: No Buyer purchase order shall be binding on Seller until accepted in writing by Seller, and Seller shall have no liability to Buyer with respect to purchase orders that are not accepted. Shipment against a purchase order shall be deemed to constitute Seller's acceptance thereof, subject to these Terms and Conditions. All purchase orders shall be subject to these Terms and Conditions, whether or not the purchase orders so state. Purchase orders accepted by Seller may not be cancelled or modified by Buyer without the prior written consent of Seller.

4. QUOTATIONS: Quotations shall expire and shall be void thirty (30) days from date of the Quotation, unless otherwise specified in the Quotation. The Quotation may be modified or withdrawn by Seller at any time before Seller's receipt of Buyer's conforming acceptance.

## 5. PRICES; PRICE CHANGES:

(a) Products. The price of the Products sold pursuant to the Contract shall be as set forth in the Quotation. If price is not specified in the Quotation, price shall be based upon Seller's prices in effect at the time of shipment. Published prices are for Products of Seller's current standard design and constructed of standard materials. Variation from the standard design and/or materials requires special pricing. Seller reserves the right at any time, and without incurring any obligation, to discontinue the manufacture of any model, to withdraw products from sale, to make changes in design, and/or to add improvements to products. Price also shall be based on freight rates in effect at the time of shipment. Where applicable, in the event of an increase in the applicable freight rates before the shipment of Products, such changes will be for the account of Buyer. Price advances, discounts, extras and other terms and conditions are subject to change without notice. Unless otherwise provided in the Quotation, price is based on delivery in accordance with the "Delivery" section below. Prices include Seller's standard packing.

(b) Services. Services prices are based on normal business hours (8 AM to 5 PM Monday through Friday). Overtime and Saturday hours will be billed at one and one-half (1.5) times the normal business hour hourly rate. Sunday hours will be billed at two (2) times the normal business hours hourly rate; holiday hours will be billed at three (3) times the normal business hours hourly rate.

6. TAXES, DUTIES AND FEES: Seller shall be responsible for taxes measured on Seller's net income based upon performance of, or payment for, work under the Contract ("Seller Taxes"). Buyer shall be responsible for all other taxes, duties, fees or other charges of any kind (including, but not limited to any manufacturer's tax, retailer's occupation tax, use tax, sales tax, excise tax, duty, custom, inspection or testing fee, value added tax, or any other tax, fee or charge of any

nature whatsoever) imposed by any governmental authority against Buyer, Seller or Seller's suppliers, based upon the Contract between Seller and Buyer. In the event Seller is required to pay any such tax, fee or charge, regardless whether such tax, fee or charge is imposed before or after Seller's delivery of the Products and/or Buyer's payment under the Contract, Buyer shall reimburse Seller therefor. In lieu of such reimbursement, Buyer shall provide Seller, at the time the order is submitted, with an exemption certificate or other document acceptable to the authority imposing such tax, fee or charge. If Seller's prices include any taxes, duties or fees (other than Seller Taxes), any change in such taxes, duties and/or fees shall be the basis for a price adjustment.

## 7. TERMS OF PAYMENT:

(a) Terms. Terms of payment are cash in full, without set-off or discount, in U.S. dollars, and by wire transfer, no later than thirty (30) days from date of invoice.

(b) Payment Default. If Buyer defaults in any payment when due, or in the event that any voluntary or involuntary bankruptcy or insolvency proceedings involving Buyer are initiated by or against Buyer, then the whole Contract price shall immediately become due and payable upon demand, or Seller, at its option and without prejudice to its other lawful remedies, may defer delivery or cancel the Contract. Where delivery is deferred and Seller does not demand immediate payment of the full Contract price, pro-rata payments shall become due as shipments are made.

(c) Buyer Financial Condition. If, during the period of performance of the Contract, the financial condition of Buyer is determined by Seller not to justify the terms of payment specified, Seller may demand full or partial payment in advance before proceeding with the work, or satisfactory security or guarantees that invoices will be promptly paid when due, or, at its option, without prejudice to other lawful remedies, may defer delivery or cancel the Contract.

(d) Delay. If delivery is delayed by Buyer, which delay must be consented to by Seller, Seller may store the Products in accordance with subsection 8(e) "Storage" below and Seller may submit a new estimate of cost for completion based on prevailing conditions. Payments shall become due from the date on which Seller is prepared to deliver the Products and storage shall be the Buyer's risk and expense as provided in subsection 8(g) "Storage" below. If manufacture is delayed by Buyer for any cause, a partial payment based upon the proportion of the order completed shall become due from the date on which Seller is notified of the delay.

(e) Late Payment Charge. Buyer shall pay a late payment charge on all amounts not paid in full when due at the rate of one and one-half percent (1.5%) per month or at the maximum legally permissible rate, whichever is lower.

(f) Exceptions. Supplement A to these Terms and Conditions lists Seller business units for which payment terms vary from payment terms set forth in this Section 7.

## 8. DELIVERY; TITLE TRANSFER; RISK OF LOSS/DAMAGE:

(a) Delivery – U.S. Buyer. For sales in the U.S. that do not involve export from the U.S., Seller shall deliver Products to Buyer EXW Seller's U.S. point of shipment (Incoterms® 2010). The point of shipment shall be the shipping dock of Seller's factory, warehouse or other facility that Seller designates at its discretion as point of shipment from time to time.

(b) Sales Involving Exports from U.S.

(1) Delivery – U.S. Buyer; Subsequent Drop Shipment to Location Outside U.S. For sales, in the U.S. to a U.S. Buyer, which involve drop shipment at Buyer's request and/or on Buyer's behalf, to a location outside the U.S., Seller shall deliver the Products to Buyer EXW Seller's U.S. point of shipment (Incoterms® 2010). The point of shipment shall be the shipping dock of Seller's factory, warehouse or other facility that Seller designates at its discretion as its point of shipment from time to time. Buyer is responsible for all transportation charges incurred after delivery of the Products to the carrier or Buyer at the point of shipment and shall reimburse Seller for any transit insurance or freight pre-paid for the Products by Seller. Buyer shall bear the risk of loss and/or damage in transportation. Buyer is responsible for filing any export documents required for export from the U.S.

(2) Delivery – Non-U.S. Buyer; Routed Export Transactions. For sales in the U.S. to a non-U.S. Buyer, Seller shall deliver Products to Buyer's freight forwarder EXW Seller's U.S. point of shipment (Incoterms® 2010). The point of shipment shall be the shipping dock of Seller's factory, warehouse or other facility that Seller designates at its discretion as its point of shipment from time to time. In a "Routed Export Transaction," as defined in the U.S. Census regulations, 15 CFR Section 30.3, where Buyer is a non-U.S. entity, Buyer shall authorize Buyer's designated freight forwarder or Seller to facilitate the export of the Products from the U.S. and to prepare and file export documentation with respect to such export transaction (hereafter, to "Facilitate the Export"). If Buyer authorizes its designated freight forwarder to Facilitate the Export, Buyer's freight forwarder shall provide Seller with a copy of the final export documentation and proof of filing. If Buyer authorizes Seller to Facilitate the Export, Buyer shall cause Buyer's freight forwarder to provide Seller the information needed by Seller to Facilitate the Export. Buyer shall give timely notice to Seller identifying whom it has designated to Facilitate the Export.

(c) Delivery Dates. Delivery dates are approximate, are not guaranteed and are based upon prompt receipt by Seller from Buyer of all necessary shipping and other information. Seller may deliver in advance of the delivery schedule. Seller reserves the right to make delivery in installments, with all installments to be separately invoiced and paid for by Buyer when due per invoice, without regard to subsequent deliveries. Delivery of the Products to a commercial carrier at the shipping point shall constitute delivery to Buyer.

(d) Title Transfer. Title to Products shall pass to Buyer upon the earlier of delivery of the Products to the carrier or Buyer at the point of shipment in accordance with subsection (a) above, except that, for Routed Export Transactions, title shall transfer to Buyer upon delivery to Buyer's designated freight forwarder. Subject to applicable law, Seller, upon notice to Buyer, may retain title to the Products until such time as Seller receives payment in full from Buyer. Title to Software shall not pass to Buyer and is subject to the applicable license.

(e) Risk of Loss/Damage. Risk of loss and/or damage shall pass to Buyer upon delivery in accordance with subsection (a) above, except that, for Routed Export Transactions, risk of loss and/or damage shall pass upon delivery of the Products to Buyer's designated freight forwarder.

(f) Delivery by Seller's Carrier. Where the parties agree that delivery shall be made at a location other than Seller's point of shipment, where Seller will deliver using its carrier or Seller's privately owned or leased

trucks, unloading at the agreed location shall constitute delivery to Buyer. Freight and/or reloading charges by Seller may not reflect actual freight charges prepaid to the carrier by Seller due to incentive discounts earned by Seller based upon Seller's aggregate volume of freight tendered to a carrier or when a carrier must be used which charges a rate which is different than the rate upon which Seller's freight and handling charges were based. When shipments are delivered in Seller's privately owned or leased trucks, Buyer will be charged an amount approximating the prevailing common carrier rate.

(g) Storage. In the event that Buyer is unable to accept delivery of the Products at time of shipment, Seller shall invoice Buyer for the full purchase price as if shipment had been made and: (i) if Seller is able to store such Products in its own facilities, Buyer will pay Seller the reasonable handling and storage charges for the period of such storage, or (ii) if Seller is unable to store such goods at its own facility, Seller reserves the right to arrange handling and storage in a suitable bonded warehouse for Buyer at Buyer's expense. In cases where handling and storage become necessary, it shall be Buyer's responsibility to notify Seller when shipment is to be made. Seller will make necessary arrangements for shipment at Buyer's expense.

## 9. EXCUSABLE DELAYS; FORCE MAJEURE:

(a) Excuse of Performance. Seller shall not be liable for any ordinary, incidental, or consequential delay or damage as a result of Seller's delay in or failure of delivery, or installation of Products or performance of Services due to (i) any cause beyond Seller's reasonable control, (ii) an act of God, act of Buyer, embargo or other government act, authority, regulation or request, fire, theft, accident, strike, slowdown or other labor disturbance, war, armed conflict, act or threat of terrorism, riot, epidemic, delay in transportation, or (iii) inability to obtain necessary labor, materials, components, or facilities. Should any of the aforementioned events occur, Seller, at its option, may cancel Buyer's order with respect to any undelivered Products or incomplete Services or extend the delivery date for a period equal to the time lost because of delay. Notice of such election shall be given promptly to Buyer. In the event Seller elects to so cancel the Contract, Seller shall be released of and from all liability for failure to deliver the Products or to perform the Services, including, but not limited to, any and all claims on behalf of Buyer for lost profits, or any other claim of any nature which Buyer might have. If shipping or progress of the work is delayed or interrupted by Buyer, directly or indirectly, Buyer shall pay Seller for all additional charges resulting therefrom.

(b) Allocation. If Seller determines that its ability to meet the demand for products, including the Products, or to obtain labor, materials, components or facilities is hindered, limited or made impracticable due to causes set forth in subsection (a) above, Seller may allocate its available supply of products, including the Products, among itself and its purchasers on such basis as Seller determines to be equitable without liability for any failure of performance which may result therefrom.

## 10. LIMITED WARRANTY.

(a) Scope and Period.

(1) Products. Seller warrants that the Products shall be delivered free from defects in material, workmanship and title and shall conform to Seller's specification agreed upon in a written and signed agreement by Buyer and Seller, if applicable, for the Products. This warranty shall expire twelve (12) months from first use of the Product or eighteen (18) months from date of manufacture of the Product, whichever occurs first.

(2) Repaired and/or Replaced Products and/or Parts of Products. Seller warrants that the repaired or replaced Products or parts of Products shall be delivered free from defects in material, workmanship and title. In the case of repaired or replaced Products or parts of Products comprising warranty remedies for Products, this warranty shall expire upon expiration of the warranty period applicable to the Products originally supplied by Seller. In the case of other repaired or replaced Products or parts of Products, this warranty shall expire twelve (12) months from the date of repair or manufacture of the Products or parts of the Products.

(3) Services. Seller warrants that the Services shall be performed in a competent and diligent manner in accordance with any mutually agreed specification. This warranty shall expire ninety (90) days from the date of completion of such Services.

(4) Software. Seller warrants that the Software shall execute, at time of delivery, in accordance with the specification agreed upon in a written and signed agreement by Buyer (as licensee) and Seller (as licensor) when properly installed in the Products. The warranty shall expire six (6) months from date of manufacture of the first Product in which the Software is loaded.

(5) Applicability. This warranty shall apply to any Products and/or Software bought, acquired, and/or used by an entity that, or person who, acquires the Products and/or Software from Buyer (a "Transferee"), except that any claim made against Seller pursuant to this warranty shall be made by Buyer only. Seller shall not be bound by this Section 10 to satisfy a claim under this Section made against Seller by a Transferee, whether such Transferee is a direct or indirect Transferee of Buyer. Buyer shall provide any Transferee of a Product or Software written conspicuous notice of Sections 10 and 11 hereof.

(6) Exceptions. Supplement B to these Terms and Conditions lists Seller Products, parts, Services and Software for which Seller's warranties vary from the warranties set forth in this subsection 10(a).

(b) Remedies.

(1) Products. If, prior to expiration of the warranty period set forth in subsection 10(a)(1), above, any Products shall be proved to Seller's satisfaction to be defective or nonconforming with the warranty set forth therein, Seller will repair or replace such defective Products or components thereof, FCA Seller's factory, warehouse or other facility that Seller designates at its discretion as point of shipment from time to time (Incoterms® 2010), or will refund or provide Buyer with a credit in the amount of the purchase price paid therefor by Buyer, at Seller's sole option. Buyer's exclusive remedy and Seller's sole obligation under this warranty shall be limited to such repair or replacement, FCA factory, warehouse or other facility that Seller designates at its discretion as point of shipment from time to time (Incoterms® 2010), or refund or credit by Seller, and shall be conditioned upon Seller's receiving written notice of any defect and/or nonconformance within a reasonable period of time, but in no event more than thirty (30) days, after it was discovered by reasonable care should have been discovered. All claims not made in writing and received by Seller within such thirty (30) day period shall be deemed waived. In no event shall Seller's liability for such defective or nonconforming Products exceed the purchase price paid by Buyer for such Products. With prior approval from Seller, Buyer shall return the alleged defective Product or part, freight prepaid, for Seller's inspection, and no other Products shall be returned to any Seller office, factory, warehouse, authorized service center or other facility, without Seller's written consent.

(2) Repaired and/or Replacement Products and/or Parts of Products.

# Terms & Conditions

If prior to the expiration of the applicable warranty period set forth in subsection 10(a)(2) above, any replacement Products and/or parts of Products shall be proved to Seller's satisfaction to be defective or nonconforming with the warranty set forth therein, the remedy set forth in subsection 10(b)(1) above shall apply to such replacement Products and/or parts of Products.

(3) **Services.** If, prior to expiration of the warranty period set forth in subsection 10(a)(3), above, any Services shall be proved to Seller's satisfaction to be nonconforming with the warranty set forth therein, Seller will re-perform such nonconforming Services. If the Services cannot be re-performed, Seller, at its option, shall refund or credit monies paid by Buyer for such nonconforming Services.

(4) **Software.** If, prior to expiration of the warranty period set forth in subsection 10(a)(4) above, (i) Buyer provides, in writing, a complete description of the claimed nonconformance in the Software, and (ii) the Software is proven to Seller's satisfaction to be so nonconforming with the warranty set forth therein, Seller will correct the nonconformance by, at its option: (i) modifying or making available to Buyer instructions for modifying the program causing such nonconformance, or (ii) making available a corrected or replacement program FCA Seller's factory, warehouse or other facility that Seller designates at its discretion as point of shipment from time to time (Incoterms<sup>®</sup> 2010).

(c) **Exclusions -** The warranties set forth in this Section 10 do not cover:

(1) shipping expenses to and from Seller's office, factory, warehouse, authorized service center or other destination designated by Seller for repair or replacement of defective Products or any tax, duty, custom, inspection or testing fee, or any other charge of any nature related thereto;

(2) costs of removing defective Products from, and/or disassembling, equipment in which Products are assembled or reinstalling Products and/or reassembling such equipment, or testing repaired or replaced Products and/or the equipment;

(3) field service travel and living costs and expenses;

(4) Products subjected to abuse, neglect, negligence, misuse, misapplication, accident, damages by circumstances beyond Seller's control, improper installation (if by anyone other than Seller), improper operation (including, but not limited to, operation in excess of rated capacity or otherwise not in accordance with installation, maintenance, or operating instructions or requirements) improper maintenance, improper storage, and/or any other than normal use or service;

(5) Products maintained, serviced, repaired or altered by anyone other than Seller or Seller's authorized service agencies;

(6) Products and/or parts not manufactured by Seller; for Products furnished by Seller, but manufactured by others, Seller will assign to Buyer the written warranty, if any, of the manufacturer, if assignment is reasonably practicable; however, Seller does not adopt or guarantee or represent that the manufacturer will comply with any of the terms of the warranty of such manufacturer; but, in no event shall Seller's obligations be greater than those provided under Seller's warranty set forth in this Section 10; and/or

(7) failures of the Software to be interruption-free or error-free or to meet Buyer's or any other party's requirements; and, problems caused by use of the Software in conjunction with third-party software, hardware, or products.

(d) **DISCLAIMER: THE FOREGOING WARRANTIES ARE IN LIEU OF ALL OTHER EXPRESS AND IMPLIED WARRANTIES ARISING BY OPERATION OF LAW OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WHETHER OR NOT THE PURPOSE OR USE HAS BEEN DISCLOSED TO SELLER IN SPECIFICATIONS, DRAWINGS, OR OTHERWISE AND WHETHER OR NOT SELLER'S PRODUCTS ARE SPECIALLY DESIGNED OR MANUFACTURED BY SELLER FOR BUYER'S USE OR PURPOSE. NO EMPLOYEE, REPRESENTATIVE, OR AGENT OF SELLER OTHER THAN AN OFFICER OF SELLER IS AUTHORIZED TO ALTER OR MODIFY ANY PROVISION OF THIS SECTION 10 OR TO MAKE ANY GUARANTEE, WARRANTY, OR REPRESENTATION, EXPRESS OR IMPLIED, ORALLY OR IN WRITING, WHICH IS CONTRARY TO THE FOREGOING.** Except where Buyer and Seller agree in a written and signed agreement upon the specifications applicable to the Products, Software, and/or Services, any description of the Products, Software, and/or Services, whether in writing or made orally by Seller or Seller's agents, specifications, samples, models, bulletins, drawings, diagrams, engineering sheets or similar materials used in connection with Buyer's order are for the sole purpose of identifying the Products and shall not be construed as an express or implied warranty. Any suggestions by Seller or Seller's agents regarding use, application or suitability of the Products shall not be construed as an express or implied warranty unless confirmed to be such in writing by Seller's authorized officer.

## 11. LIMITATIONS OF REMEDY AND LIABILITY:

(a) **Breach of Warranty Claims.** Buyer's only remedy for breach of any warranty under the Contract, other than the warranty provided under Section 13 "Intellectual Property Indemnity," shall be the applicable remedy set forth in Section 10 "Limited Warranty" above. Seller's total liability for any and all breach of warranty claims under the Contract shall not exceed the purchase price allocable to the Product, Software or Service or part thereof which gives rise to the claim.

(b) **Other Claims.** Seller's liability for any claim other than a breach of warranty claim under Section 10 "Limited Warranty," whether in contract, negligence, tort, strict liability, indemnity or otherwise for any loss or damage arising out of, connected with, or resulting from the Contract or the performance or breach thereof, or from the design, manufacture, sale, delivery, resale, repair, replacement, installation, technical direction of installation, inspection, operation or use of any Products covered by or furnished under the Contract or from Services rendered under the Contract, shall in no case (except as provided in Section 13 "Intellectual Property Indemnity") exceed five percent (5%) of the purchase price allocable to the Products or part thereof or Services giving rise to the claim.

(c) **Consequential Damage Disclaimer.** SELLER SHALL NOT BE LIABLE FOR AND DISCLAIMS ALL CONSEQUENTIAL, INCIDENTAL, CONTINGENT, SPECIAL OR PUNITIVE DAMAGES WHATSOEVER. Seller shall not be liable for lost profits or revenues, loss of use of the Products, Software or any related equipment or systems, cost of capital, cost of substitute products, cost of facilities or services, business interruption, downtime, shutdown, or slowdown costs, any other types of economic loss, penalties, special or punitive damages, and claims of Buyer's customers for any such damages.

(d) **Expiration of Claims.** All claims against Seller arising out of or related to the Contract or the performance or breach thereof shall expire unless made and presented to Seller in writing by Buyer before expiration of the applicable warranty period.

(e) **Precedence.** The limitations of this Section shall apply regardless of whether a claim is based in contract, tort (including negligence), warranty, strict liability, intellectual property, or otherwise, and shall take precedence over any conflicting terms and conditions, except where the limitations of liability of such conflicting terms limit Seller's liability further.

## 12. INDEMNITY:

(a) **Third party claims.** Each of Buyer and Seller (each an "Indemnified Party" and an "Indemnifying Party") shall indemnify the other party from and against claims brought by a third party, for bodily injury or damage to the third party's tangible property, to the extent such injury and/or damage is caused by or concurrent negligence of Buyer and Seller, the loss or expense shall be borne by each party in proportion to its degree of negligence. For purposes of Seller's indemnity obligations hereunder, Products shall not be considered third party property and the facility in which a Product or Software is used and/or the Services are performed shall not be considered third party property.

(b) **Indemnity by Buyer for Third Party Warranty Claims.** If Buyer supplies Products or Services to a third party, uses Products or Services at a facility owned by a third party, and/or transfers Products and/or Software to a third party, Buyer shall indemnify and defend Seller from and against any and all claims by, and liability to, any such third party in excess of the limitations set forth in Sections 10 "Limited Warranty" and 11 "Limitations of Remedy and Liabilities." For purposes of this subsection (b), "Seller" means Seller, its affiliates, suppliers, contractors, licensors and their employees.

13. **INTELLECTUAL PROPERTY INDEMNITY.** Seller warrants that, to the best of its knowledge, Products, Services and/or Software furnished hereunder, and any part thereof, (each a "Delivered Item") shall be delivered free of any rightful claim of any third party not affiliated with Buyer for infringement of any U.S. patent, any trademark registered in the U.S. Patent and Trademark Office and/or any copyright registered in the U.S. Copyright Office. Seller will, at its own expense, defend or settle any such claim that may be instituted against Buyer for alleged infringement by the Delivered Item of any U.S. patent, any trademark registered in the U.S. Patent and Trademark Office and/or any copyright registered in the U.S. Copyright Office provided that: (a) such alleged infringement consists of the use of the Delivered Item for (i) any of the purposes for which Buyer informed Seller such Delivered Items would be used, or (ii) if Buyer did not so inform Seller, any of the purposes for which Buyer reasonably believed such Delivered Items would be used; (b) Buyer shall have made all payments for such Delivered Items then due hereunder; (c) Buyer shall give Seller immediate notice in writing of any such suit and transmit to Seller immediately upon receipt of all processes and papers served upon Buyer; (d) Buyer does not take any position adverse to Seller in connection with such claim; and (e) Buyer shall permit Seller through Seller's counsel, either in the name of Buyer or in the name of Seller, to defend such suit(s) and give all needed information, assistance and authority to enable Seller to do so.

In case of a final award of damages in any such suit, Seller will pay such award but will not be responsible for any compromise settlements made without its written consent. In case the Delivered Item itself is in such suit held to infringe any valid patent issued in the United States and/or a trademark and/or copyright registered in the United States, and its use is enjoined, or in the event of a settlement or compromise approved by Seller which shall preclude future use of the Delivered Item, Seller shall, at its own expense and at its sole option, either: (a) procure rights to continue using such Delivered Item; (b) modify the Delivered Item to render it non-infringing; (c) replace the Delivered Item with a non-infringing Product and/or Software; or (d) refund the purchase price paid by Buyer for the Delivered Item after return of the Delivered Item to Seller (less reasonable depreciation for any period of use). Notwithstanding the foregoing, Seller shall not be held responsible for claims of infringement of any patents covering the use of the Delivered Item in combination with other goods or materials not furnished by Seller.

The foregoing states the entire liability of Seller for intellectual property infringement and in NO EVENT SHALL SELLER BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES ATTRIBUTABLE TO AN INTELLECTUAL PROPERTY INFRINGEMENT. Buyer, at its own expense, shall defend Seller against, and/or settle, (a) any patent, trademark, copyright or other intellectual property infringement claim pertaining to a Delivered Item furnished by Seller to Buyer manufactured in accordance with designs, drawings or other descriptions proposed or furnished by Buyer; and (b) any claim against Seller of contributory infringement resulting from the use or resale by Buyer of a Delivered Item sold hereunder. Buyer shall indemnify Seller for any award against Seller or settlement by Seller regarding any such claims and attorneys' fees and defense costs incurred in defense of such claims.

## 14. SOFTWARE LICENSE:

(a) **License Grant:** Seller grants Buyer a nonexclusive, royalty-free, perpetual, limited license to use the Software in the U.S. and solely in conjunction with (a) the operation of the Products purchased and sold under the Contract and/or other product meeting Seller's specifications; and (b) any other purpose agreed upon in a written and signed agreement between Buyer and Seller.

(b) **Scope of License:** Upon Seller's prior written approval, Buyer may make a reasonable number of copies of Software as necessary for backup, configuration, installation, and restoration of the Products. Also, upon Seller's prior written approval, Buyer may authorize a third-party contractor or service provider to exercise these rights on Buyer's behalf and for Buyer's benefit. Buyer may transfer possession of Software and its media to another party only in conjunction with the transfer of the Products on which the Software is loaded and only upon agreement of the other party to the terms and conditions of the Contract. Upon such transfer, Buyer shall destroy all Buyer's copies of Software and related documentation. All licenses and grants pursuant to the Contract shall immediately terminate once Buyer no longer rightfully owns or possesses the Products. No other rights under this license are granted. Upon Seller's request, Buyer shall provide Seller with written notice of any such transfer providing the name, address, and contact information of the subsequent Buyer within 15 days of such transfer.

(c) **Use Restrictions:** Buyer shall not (a) copy, display, transfer, adapt, modify, or distribute in any form the Software except as set forth in the Contract, or in Seller documentation provided by Seller to Buyer with the Software; (b) reverse engineer, disassemble, decompile, or otherwise translate the Software's object code, unless expressly permitted by applicable law without the possibility of contractual waiver; or (c) sublicense or lease the Software or any copy thereof except with the transfer of the Products on which the Software is loaded. Except as provided under the terms of Seller's standard escrow agreement between Seller and Buyer, if applicable, Buyer shall not to make available to any party,

without prior written consent from Seller or its authorized agent, source code for the Software. Buyer shall not, directly or indirectly, export or re-export, or knowingly permit the export or re-export of, the Products, or any technical information about the Products, to any country for which the United States Export Administration Act, any regulation thereunder, or any similar United States law or regulation, requires an export license or other United States Government approval, unless Buyer obtains the appropriate export license and obtains written approval from Seller.

(d) **Maintenance and Support:** Seller may offer to Buyer the option to purchase from Seller annual Software maintenance and support services under the terms and conditions of Seller's then-standard maintenance and support agreement. Buyer may renew this maintenance term at Seller's then-current maintenance rates. In the event Buyer purchases additional Software licenses, maintenance fees for such licenses shall be prorated to be coterminous with Buyer's existing maintenance period. In no event shall Seller be responsible for providing maintenance services for a period during which maintenance coverage is lapsed.

15. **SECURITY AGREEMENT AND FINANCING STATEMENTS:** As security for payment of the purchase price under the Contract, Buyer hereby irrevocably grants Seller a security interest in the Products purchased by Buyer, together with all accessories, attachments and replacement parts and all substitutions, replacements and proceeds thereof to secure payment of the purchase price and of all monies which may be due under the Contract. Buyer hereby authorizes Seller to file all financing statements, any amendments and continuations thereof, or any other documents necessary or reasonably required, for the perfection and protection of a security interest under applicable law, and to deliver notice to prior holders of security interests, of Seller's security interest in the Products to protect its interest.

16. **INSURANCE:** Until payment in full of the purchase price, Buyer shall maintain insurance covering all Products sold by Seller to Buyer in such amounts and against such risks as is customary by companies engaged in the same or similar business and similarly located, and shall, upon Seller's request, furnish evidence of such insurance satisfactory to Seller.

17. **DRAWINGS; OTHER DESIGN DATA:** All specifications, drawings, designs, data, information, ideas, methods, product samples, tools, gauges, dies, fixtures, patterns and/or inventions made, conceived, developed or acquired by Seller in connection with procuring and/or executing the Contract will vest in and inure to Seller's sole benefit notwithstanding any charges therefor which may have been or may be imposed by Seller on Buyer. Buyer shall not give, loan, exhibit, sell or transfer to any person who is not a Buyer employee and authorized to receive such information, or to any organization or entity, any drawing, photograph, specification or product sample furnished by Seller or reproduction thereof which may enable such person, organization or entity to furnish similar products or parts thereof.

18. **RETURN OF PRODUCTS:** No Product or part shall be returned to Seller without written authorization and shipping instructions first having been obtained from Seller.

19. **ASSIGNMENT AND SUBCONTRACTING:** None of Buyer's rights under the Contract shall be assigned by Buyer to any other person, whether by operation of law or otherwise, without Seller's prior written approval. Seller may, without the necessity of obtaining Buyer's prior written consent, assign the Contract or subcontract the production of all or any portion of the Products and/or performance of the Services.

20. **CANCELLATION:** No purchase order submitted to Seller may be cancelled by Buyer without the prior written consent of Seller, which consent will at all times be conditioned on Buyer's agreement to pay Seller's cancellation charge. For a finished Product that, in Seller's judgment, is readily resalable to others, the cancellation charge shall be 15% of the invoice price of the Product. For all other cancellations, the cancellation charge shall amount to all cost and expenses incurred by Seller and arising out of or in connection with Buyer's purchase order plus reasonable profit. In no event shall the cancellation charge be less than 10% of the invoice price of the Product or more than the invoice price.

21. **HIGH RISK APPLICATION USE DISCLAIMER: PRODUCTS AND SERVICES SOLD BY SELLER ARE NOT INTENDED FOR USE IN CONNECTION WITH ANY NUCLEAR FACILITY OR ACTIVITY, CRITICAL SAFETY SYSTEM, MEDICAL DEVICE, MILITARY DEVICE, SATELLITE, AVIATION EQUIPMENT, AIR TRAFFIC CONTROL EQUIPMENT, OR OTHER HIGH RISK APPLICATIONS (COLLECTIVELY, "HIGH RISK APPLICATIONS"). SELLER SHALL NOT USE OR PERMIT OTHERS TO USE PRODUCTS OR SERVICES FOR SUCH HIGH RISK APPLICATIONS WITHOUT SELLER'S PRIOR WRITTEN CONSENT. IF SO USED WITHOUT SELLER'S PRIOR WRITTEN CONSENT, SELLER DISCLAIMS ALL LIABILITY FOR ANY DAMAGE, INJURY OR CONTAMINATION, AND BUYER SHALL INDEMNIFY AND HOLD SELLER, ITS OFFICERS, AGENTS, EMPLOYEES, SUCCESSORS, ASSIGNS AND CUSTOMERS HARMLESS FROM AND AGAINST ANY AND ALL SUCH LIABILITY. SELLER'S CONSENT, IF ANY, WILL BE CONDITIONED UPON ADDITIONAL TERMS AND CONDITIONS ACCEPTABLE TO SELLER.**

22. **GOVERNING LAW; VENUE:** These Terms and Conditions and the Contract shall be governed by and construed in accordance with the laws of the State of Wisconsin. Seller and Buyer irrevocably submit to the exclusive jurisdiction of the state courts located in Rock County, State of Wisconsin and the federal courts located in the State of Wisconsin, and Seller and Buyer waive any objection to venue or forum non conveniens, for the resolution of any dispute relating to these Terms and Conditions or the Contract. The rights and obligations of Seller and Buyer shall not be governed by the provisions of the United Nations Convention on Contracts for the Internal Sale of Goods.

23. **EXPORT/IMPORT:** Buyer shall comply, in the receipt and use of the Products and the Software, with all applicable import and export control laws, regulations, orders and requirements of the jurisdictions in which the Seller and Buyer are established or from which Products and Software are provided. Buyer shall not transfer, release, import, or export Products and/or Software in violation of such applicable laws, regulations or other legal requirements. Buyer shall provide a completed end-user certification in a form satisfactory to Seller upon Seller's request.

24. **ATTORNEYS' FEES:** Buyer agrees to pay all of Seller's costs and expenses of collection and related litigation, including but not limited to attorneys' fees and costs.

25. **SALVATORY CLAUSE:** The invalidity, in whole or in part, of any of the provisions of these Terms and Conditions, shall not affect the enforceability of any of the other provisions thereof.

26. **APPLICABILITY:** These Terms and Conditions as stated herein are applicable as of the date of this printing and until such time as changed by Seller.

Revised, April 2014

## IMPORTANT INFORMATION PLEASE READ CAREFULLY

The following DANGER, WARNING and CAUTION information is supplied to you for your protection and to provide you with many years of trouble free and safe operation of your Marathon Special Products components.

### DANGER

- Devices sold by Marathon Special Products provide for interconnection of electrical circuits and such are, or can be, points of live electrical contact. It is the responsibility of the Buyer or user to ensure through the use of enclosures, insulation, engineering controls, or other means in the application, that the wiring device is protected from intentional or accidental contact in an energized condition. Failure to do so can create the potential for electrical shock and associated serious injury.

### WARNING

- Only qualified personnel should install and troubleshoot electrical products due to the potential for serious injury related to electrical shock. Make certain that the power supply is disconnected and/or locked out before attempting to install, remove or service components.

### CAUTION

- Connection tightness is critical to electrical performance. Buyer, user, or installer must always ensure that the proper screw torque is applied and maintained.
- Buyer or user must ensure that proper clearances are maintained between energized electrical components and all other devices including but not limited to the enclosure and mounting mechanism.
- Install and ground per local and national code.
- Buyer shall be solely responsible for determining the adequacy of the product for any and all uses to which Buyer shall apply the product. Buyer must ensure that the application of the device conforms to all standards, codes, policies or practices that govern or apply to their equipment or application. Marathon Special Products uses design parameters, materials, and construction methods intended to meet the standards noted in the engineering catalog, with specific suitability of use and restrictions as noted in the appropriate agency files. The application by Buyer shall not be subject to any implied warranty of fitness for a particular purpose.
- Products in this catalog are tested and listed with various standards agencies. They will meet or exceed all performance guidelines as tested and qualified. Buyer or user must check that applications do not exceed rated capacities of voltage and amperage and that appropriate wiring practices are followed.
- Products are intended for use in an "as sold" condition. Modification of components can affect performance and ratings and subsequently the safety of the component system. Buyer or user assumes liability for component modification.
- Electrical products in this catalog are designed for use in appropriate enclosures. Buyer or user is responsible to ensure that appropriate environmental control is designed into the application.

In the event of the resale of any goods, in whatever form, Resellers/Buyers will include the following language in a conspicuous place and in a conspicuous manner in a written agreement covering such sale:

The manufacturer makes no warranties or representations, express or implied, by operation of law or otherwise, as to the merchantability or fitness for a particular purpose of the goods sold hereunder. Buyer acknowledges that it alone has determined the goods purchased hereunder will suitably meet the requirements of their intended use. In no event will the manufacturer be liable for consequential, incidental or other damages. Even if the repair or replacement remedy shall be deemed to have failed of its essential purpose under section 2-719 of the Uniform Commercial Code, the manufacturer shall have no liability to Buyer for consequential damages.

Resellers/Buyers agree to also include this entire document including the dangers, warnings and cautions listed above in a conspicuous place and in a conspicuous manner in writing to instruct users on the safe usage of the product.

This information should be read together with all other printed information supplied by Marathon Special Products.

# NOTES

Marathon Special Products, a Regal Beloit Corporation, has served the electrical/electronic component industry since 1955. Our facility in Bowling Green, Ohio, USA, contains all manufacturing and warehousing operations including an extensive electrical test lab to design, engineer and manufacture products of only the highest quality. Our ability to mold, stamp and assemble all of our parts makes us unique in the industry.

In addition, to our broad range of fuse holders, MSP has consistently met and/or exceeded customer quality requirements and expectations to our terminal block line since 1931. Quality is a way of life at Marathon and over the years, the company has earned a reputation for quality and reliability. Our customers know they can depend on Marathon product for tough and reliable performance. That's why, when the industry needs a circuit protection or wire terminating device, they think Marathon.

Marathon also has the engineering expertise to design and manufacture custom blocks for your special requirements. Our product design engineers use the latest computer aided design systems, while integrating all engineering disciplines to give you low cost product with short introduction time and high quality.

All of these factors make Marathon Special Products one of the most respected names in the industry.

THE **BEST** SOURCE for EVERY INDUSTRY
